Blank Banners and Banner Finishing

Blank Banners are how it all began for us at Banner Box. We provide the complete service focused on the needs of the Sign Trade.

Cut vinyl graphics remain one of the fastest and most effective ways to put a message onto a banner. All banners are made to order in the colour and material of your choice and individually finished to the specification you require. We endeavour to dispatch on the day of order so you don't have to wait long for delivery or hold stocks.

Material Options

Premier Grade

This is our most popular banner material. We supply a high quality 600gsm range of PVC. It has smooth graphics-receptive surface and excellent tear resistance.

Single Sided Banners

The standard finishing of single sided banners is hemmed on all edges and fitted with brass eyelets.

Double Sided Banners

White DS Banners

White double-sided banners are made from total block PVC; an opaque 700gsm PVC with a double-sided graphics quality finish. Simply add 50% to single sided price.

Coloured DS Banners

We can advise a range of options depending on your requirements. Simply add 100% to single sided price.

DS = Double Sided

Standard colours available:

Special colours available.

Add 35% to Premier Grade prices.

Economy Grade

Economy Banners are made from a 350gsm PVC. They are suitable for internal and short term external use. Banners are hemmed and eyeleted, ready for your graphics.

Standard colours available:

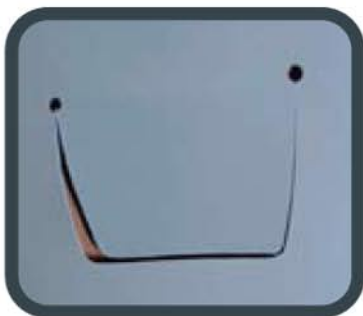

Banner & Print Finishing

We can make a banner fit whatever the requirement. As well as conventional rectangular banners, we can also manufacture bespoke shapes and sizes.

Trade Printed banner finishing

Wind Vents

Wind vents help to diffuse pressure exerted on external banners by the wind. Die-cut into the face of the banner with anti-rip finishing to the end of each vent. Wind vents can be added to any banner but are particularly suitable for double-sided applications.

Pockets

To fit banners to scaffold poles or many of our banner support systems, your banners may require pockets. We can finish these to any diameter you require and reinforce as necessary.

How we finish our banners

Each banner is hand cut in the material and colour of your choice.

A hem is sewn or welded all round the banner to reinforce the edge. If your banner is to be fitted in an exposed position, such as across a street or in a windy location; we can add strength to the corners and use larger eyelets. We can add pockets for wires and make your banner as robust as possible.

High quality brass eyelets are fitted to the banner.

Banners are packed and dispatched for next day delivery.

Digital and Screen Print Finishing

As the sign & graphics industry moves to more and more in-house digital print, we can provide the service to turn a roll of print into a completed product. Our specialist equipment enables you to simply send the print and we will do the rest.

Banner Box's dedicated finishing facility can turn printed images into finished products for all owners of wide-format digital printing systems. We accept media from wide and super-wide systems. Our programme of continuous investment in the latest facilities, enables us to deal with super-large graphics in a clean-room environment.

Our Full Service Includes:

- Trimming
- High Frequency Welding
- Edge Finishing
- Sewing
- Eyeleting
- Packing and Order Collation
- Direct Dispatch
- Installation

We can now offer automated finishing on our Zund 2XL digital cutter. Bringing new levels of accuracy and consistency.
