What You'll Receive

A - Hinged Leg x2

B - Top Hinged Bar x2

C - Bottom Bar x2

D - Peg Extractor x1

E - Front Ground Peg x4

F - Bungees

Double Sided Banner Frame

1. Identify the front and back of the **hinged legs** (A) of the Double Sided Banner Frame. The hinge will be attached to the back leg.
2. Attach two **elastic bungees** (F) to the front leg.
3. Connect the **top hinged bar** (B) and **bottom bars** (C) to the leg using the black connector and pushing firmly to secure the connection.
4. Attach additional elastic bungees to each of the top and bottom tube section and two elastic bungees to the second front leg.
5. Connect the top and bottom tube sections to the second leg using the corresponding black connector and pushing firmly to secure the connection.
6. Stand up the Double Sided Banner Frame and push out the back legs, allowing it to stand freely. Close the hinge on both legs to secure.
7. Attach the first banner to the frame by hooking the elastic bungees through the eyelets of the banner. Attach to the top and bottom tube section first, beginning with the top left corner and working clockwise.
8. Starting in the top left corner and working clockwise, attach the remaining elastic bungees to the legs of the Double Sided Banner Frame.
9. Repeat steps 7 and 8 for the second banner. Adjust the positioning of the elastic bungees to ensure the banners sit central to the frame.
10. Move the frame to the intended location and secure to the ground by pushing the four **ground pegs** (E) into the ground until they fit securely against the bottom sections. The Double Sided Banner Frame is now installed.
