**D** - Back Ground Peg x2

**E** - Front Ground Peg x2

**F** - Bungees

## Standard Duty Banner Frame

1. Identify the front and back of the **hinged legs** (B) of the Standard Duty Banner Frame. The hinge and feet will be attached to the back leg.
2. Attach two **elastic bungees** (F) to the front leg.
3. Connect the **top and bottom tube sections** (A) to the leg using the black connector and pushing firmly to secure the connection.
4. Attach additional elastic bungees to each of the top and bottom tube section and two elastic bungees to the second front leg.
5. Attach the top and bottom section to the leg by pushing firmly into the black connector. The banner frame can now stand up freely.
6. Attach the banner to the frame by hooking the elastic bungees through the eyelets of the banner. Attach the top and bottom tube section first, beginning with the top left corner and working clockwise.
7. Starting in the top left corner working clockwise, attach the remaining elastic bungees to the legs of the Standard Duty Banner Frame.
8. Adjust the positioning of the elastic bungees to ensure the banner sits central to the frame and move the frame to the intended location.
9. Secure to the ground by pushing the **back ground pegs** (D) through the holes in the back feet. Push the **front ground pegs** (E) into the ground until they fit securely against the bottom sections.
10. The Standard Duty Banner Frame is now installed.
