

Windchaser Feather Flags - Water Base

What You'll Receive

A - Water Base

B - Black Plate

C - Spigot

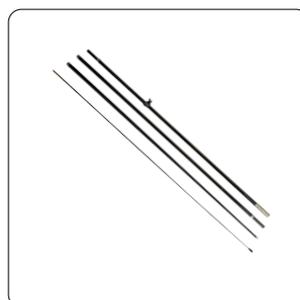

D - Spring Washer

E - Toothed Washer

F - Wing Nut

G - Pole Sections

H - Feather Flag

1. Remove the **water base** (A) and all the fixings from the packaging.
2. Insert the **black plate** (B) onto the **spigot** (C) and then insert through the hole on the top of the water base.
3. Lift the water base to secure the spigot on the bottom. First add the black plate, followed by the **spring washer** (D) and then the **toothed washer** (E). Secure by inserting and tightening the **wing nut** (F).
4. Remove the cap on top of the base, fill with water and reinstall the cap. Where possible, we recommend completing this step with the water base in it's final location.
5. Remove the **pole sections** (G) from the packaging and lay flat on the floor.
 - Small: 2 sections
 - Medium: 3 sections
 - Large: 4 sections
6. Identify the correct order of the pole sections and push fit each section together to create the flagpole.
7. Remove your **feather flag** (H) from all packaging, unfold it and lay out flat on the floor.
8. Insert the top of your pole into the pole pocket opening located at the bottom of the flag. Feed the pole through the pole pocket until the top of the pole reaches the end of the pole pocket at the top of the flag.
9. Secure the flag to the pole by attaching the elasticated bungee loop at the base of the flag to the cleat.
10. Lift your feather flag and pole to a horizontal position and place the base of the pole onto the spigot.
11. Your feather flag installation is now complete.
