

Wall Mount System - Heavy Duty

System weight
15kg

What You'll Receive

A - Wall Bracket x 2

B - Top Arm

C - Banner Arm

D - Rigging Screw x 2

E - Bottom Arm x 2

Wall Mount System - Heavy Duty

- 1) Identify the final position where the wall mounted system will be located. Starting at the top, hold a **wall bracket (A)** against the wall and mark on the wall where the fixings will be located.
- 2) Remove the bracket from the wall and drill into the marked locations. Once drilling is complete, install raw bolts into the wall.
- 3) Holding the bracket against the wall, install the fixings and tighten until the bracket sit flush against the wall.
- 4) Install the **top arm (B)** into the bracket;
 - Remove securing bolts from the bracket
 - Insert the pole into the bracket
 - Ensure the holes in the bracket and poles are aligned
 - Reinsert the securing bolt
- 5) Install your banner onto the top arm and allow the banner to drop.
- 6) Thread the **banner arm (C)** through the sleeve at the bottom of the banner, ensuring that the D loops sit outside of the banner and are facing down.
- 7) Attach one end of the **rigging screw (D)** onto both D loops on the banner arm.
- 8) Install the **bottom arm (E)** into the second bracket, following instructions in step 4.
- 9) Attach the other end of the rigging screws onto the two D-loops on the bottom arm.
- 10) Extend the rigging screws, allowing you scope to tighten the banner once installed. Hold the bracket against the wall and mark out the drilling points.
- 11) Remove the bracket from the wall and drill into the marked locations. Once drilling is complete, install raw bolts into the wall.
- 12) Holding the bracket against the wall, install the fixings and tighten until the bracket sits flush against the wall.
- 13) To complete installation, adjust both rigging screws to ensure the banner is under correct tension and perfectly aligned.
